GILLARD'S

SHEEP DIP

A Glycerine Compound

NON-POISONOUS

GILLARD'S

DIP

PREVENTS AND CURES SCAB

This Dip is most carefully prepared by the latest improved methods and can be used with

COLD WATER

Supplied to the Prince of

Wales's Farm at

SANDRINGHAM

TESTIMONIALS

From Mr. J. J. MASON, Capilla del

Sector, June 29, 1881.—The dip which you

sent me I used according to directions, and I

can assure you that it gave the desired result.

During four years of practical experience of

cutting scab in sheep, I have seen many spec-

imens, and I consider Gillard's Dip the only one

that gives complete satisfaction. It improves

the quality and promotes the growth of the

wool. For efficiency, economy and facility of

application, I prefer it to any dip I have used.

From Mr. JAMES M. THOMAS, Estancia

Santa Ines, Monte, June 29, 1881.—Having

given a good trial to Gillard's Dip, I have

much pleasure in bearing my testimony to its

valuable quality as a Sheep Dip. It destroys

all insect life with which sheep are infested,

mixes readily in cold water, does not injure

the hands, and softens all hard parts. I shall

strongly recommend it whenever an opportunity

offers. As regards the cheapness, it

should command a good sale.

NOTE.—A sample drum will be supplied

gratis to any Estanciero

who is willing to give the Dip

a fair trial and report on same

to the

WARD & PAYNE'S

Sheep Shears

OBTAINED

THE ONLY GOLD MEDAL

For Sheep Shears

AT THE

INTERNATIONAL

Exhibition

MELBOURNE

1881.

Ward & Payne's Shears No. 100

and 125 are very much improved and

manufactured specially for this

country.

They are made of the best steel

and in price and quality will com-

pare favorably with any others in

this market.

They can be had direct from the

importers J. MOHR BELL & Co.

or through all Hardware dealers.

Facts worth knowing

1—During last season the demand

for WARD & PAYNE'S Shears in

Australia was so excessive that cable

messages were continually being sent

for increased supplies.

2—Single pairs of WARD AND

PAYNE'S Shears clipped 3,000

heavy woolled sheep, and the most

expert clippers in New Zealand ad-

firm that they can clip nearly 10

sheep per day more with these

shears than with any other.

3—WARD & PAYNE are intro-

ducing two new Patent Shears No.

200 and 'The Equalizing Spring'

for which they claim superior ad-

vantages. The undersigned will be

glad to forward sample pairs on

application.

4—Testimonials from Australia, N.

Zealand and the RIVER PLATE

can be seen at the Office of the un-

derigned

men were dead. It is said that a revolution is on the ' tapis,' and of course the souls of the policemen are too much filled with patriotic (?) ardour to be able to attend to such trifles as the foregoing.

The account of ostrich farming at the Cape, which appeared in a late issue of the Standard, was very interesting, but the most important particular was omitted, viz. how to catch the ostriches in order to get the feathers, or rather I should say to catch them, and secure them while the feathers are being cut, without injuring them! I have some 65 or 70 tame rheas (ostriches of the country). They are sufficiently tame to allow a person to strike them with a whip or to take anything thrown to them, and are the produce of four hand-reared ostriches. Though they go into the corral to dust themselves often enough of their own accord, they have a decided objection to being driven in. It has been suggested that I should cut off one toe of each bird to facilitate the driving; this, however, seems very cruel, if there is a more humane method.

Last year I tried catching them with light 'bolos,' but several were hurt and others driven through the fences. I have never seen any mention made of their great utility in destroying the young locusts. I consider a troop of tame rheas to be worth ten times as many men with 'umbuda' bags, brushes &c. for this purpose. When the hoppers in their daily peregrination approach the edge of the chara, hurry them out with a little burning straw, and drive up the troop of rheas. Very few hoppers will return to the chara; it is incredible that quantity 60 or 70 ostriches will consume it. It is easy enough to drive them to the locusts; the difficulty is to get them into a yard to pluck.

The entries for the races of the Porongos Jockey Club on Sept. 8th and 9th have just closed. For the flat races the entries are very large indeed—in fact they never have been so numerous; but the number of steeple-chase horses shows a falling off. This is easily accounted for, as the number of English members of the Club might be counted on the fingers. Query—Is there any steeple-chase meeting on the P.A. side of the water, except the Palermo business, which, I am told, savours strongly of Hengler, the sawdust and gas light.

Quien Sabé?

EDITOR'S TABLE.

Yesterday was a very noisy day. The thunder began shortly before noon, and a Hades darkness spread over the city before the rain came down, necessitating the turning on of gas everywhere. During the rain, pus there were a couple of specially loud thunder claps. The telephone wires stood the lightning well, thus falsifying all the predictions as to the 'eternal smash' they would bring about in the first thunder-storm. The weather is glorious for camp interests.

We rejoice to announce that Mr. William Martin and his amateur corps have resolved to repeat 'Checkmate' and 'Pans' on the evening of Wednesday 14th. Tickets can be had at Mr. W. Makers', in Calle Florida, and on after Tuesday next. For list of prices, see advertisement in another column.

We were shown yesterday a genuine curiosity (nothing like it even in our Museum) in the shape of a number of Tom Pankener's Dublin Journal of the year 1703. The advertisements from stock-brokers, Lottery brokers, etc. are interesting. Amongst the 'On Change' news is the announcement of a rise of three per cent in Consols in London owing to the declaration of war by France against Spain. There are long (comparatively) accounts of the war then going on in the Low Countries, in which the names of Dumouriez, Duke Charles, and other military celebrities of the time appear.

The police have arrested the prime mover in the body-snatching case at the Recoleta—a man named Monzo, whose wife and children had been frequently assisted with money, food and clothes by both Mrs. Dorrego and her daughter Mrs. Miro. This whole thing is said to have planned the whole thing. He's a nice specimen of humanity.

Our colleagues, at least most of them, are devoting quite too much attention to the Chilian Treaty, and we read the cheerful heading 'Possibility of War' over one article. Better 'shut up' on the subject and leave the matter in the hands of both Congresses. On this topic especially silence is gold. Nothing new can possibly come from human pen on this threadbare subject.

as he finds California getting too hot for him. Brazil has all but resolved to import him for her sugar plantations, and he might take a fancy to come down here also. We had a visit some days ago from a Celestial who had just come from the Great Republic and was looking for a situation as butler. He spoke English perfectly, and was as smart a young man as we have seen of his class.

Mr. Firmat gave a lecture last night at the Spanish Club on Ballooning, and dedicated it to the fair sex. How appropriate.

M. le Vicomte de Richmond has arrived as Secretary to the French Legation, vice Comte la Marliere who will go home shortly.

Plaza Parque appears to be getting, as of old after nightfall. On Thursday night at 10 o'clock a tailor who was carrying a new swallow-tail home to a customer was knocked on the head by a man following him, who made off with the coat but was speedily captured by a policeman at the corner.

They had a mild shock of earthquake in Mendoza last week, but no damage to speak of was done.

We are requested to announce that tickets for the amateur performance and ball at the German Club Concordia can be had at the Clubhouse.

Many of our city contemporaries agree with us in thinking that there will be 'unratable war' in the National Bank share market if the speculation for a rise be carried any further, and that new Bolsa risks are imperatively called for. A corner of a similar kind was got up in the shares of a new company some years ago on the London Stock Exchange. Three times the number of shares in the company were bought by the Bulls, who then 'stood at ease' and called for the shares. The Committee, as well as we remember, made short work of the business and expelled every member of the House who had anything to do with getting up the 'rig,' besides declaring most of the time bargains in the shares null.

The Independent of Rosario published a very good article in a recent number on 'Agricultural Interests,' in which it soundly rurs its provincial colleagues for ignoring those interests 'in toto,' while their columns are overflowing with blatant political twaddle which nobody reads. Hear! Hear! colleague.

Ladies will take interest in a very curious machine, called 'the pianet,' which is now on view in a music shop in Calle Maipn, between Corrientes and Cuyo. When attached to a piano it plays the most elaborate airs with a precision and brilliancy of execution that Thalberg or our friend Pfeiffer might envy. This little machine will be hailed by all human beings with ears as an innovation that may possibly reduce the value of the piano as a domestic instrument of torture in the hands of indifferent players, whose name is Legion. The inventor who would render what is cynically called 'practising' superfluous, would deserve canonization.

It appears that the Western Railway terminus cannot be removed from the Parque to Plaza Once under three months. Half town may be killed at the corner of Talcahuano and Parque in the meantime.

The 'Portena Kiss' is the name of a new Argentine perfume to be exhibited at the Continental Exhibition. It is very, very like 'Kiss me quick and don't tell.'

A young law-student, named Lopez, from Concepcion, dropped dead on Thursday on the passenger mole, as he was landing from the river steamer. The number of young persons who have lately 'shuffled off' suddenly is both singular and alarming.

The Pampa reports a sharp let-down in the prices giving for Rio Negro lands, which, according to our colleague, are now offered on all sides at \$25,000 per league, although \$40,000 was paid a week ago. The cause of this is that 800 square leagues down there are about to be presented to the officers who took part in the Rio Negro Expedition, and most of these estates will probably be converted into cash by the galleant owners.

Madame Favart was given Thursday by the new French troupe at Colon. The weather was awful more inopportune, and many perspection of who had taken tickets had reflected, I am to remain at home. The all points ing and singing were good; but reserve our critique on this troupe upon for a future day, when we shall be more leisure to enter into detail position.

Advices from Rosario announce since Locusts at the Roldan Colony, we require not much damage done by them of our yet.

Mr. William Martin's Lecturings at Elocution, to the Excelsior School will be postponed until the 22nd, verment owing to the unfavorable state to avail the weather on Thursday last, sources we

RUSTON PROCTOR & CO.^{IA}

As this season is advancing we call attention to our Thrashers, who have an extra Screening and Hired Sifters, larger than any other system. They are also provided with a new design of separator for cleaning dirty wheat.

We have also a stock of Combined Mowers and Reapers, Horse Gears, double and single, Flour Mills, Maize-shelling Machines, &c.

Calle General Lyvalle No. 166 y Calle Montevideo No. 34.
En el año 1911

The image shows the front cover of an old book. The cover is a dark, mottled black or very dark brown color with a pebbled texture, characteristic of leather or a similar material. There are numerous small, light-colored spots and larger areas of discoloration across the surface, suggesting age and wear. The top edge of the cover is uneven and shows some of the underlying board material where the outer layer has worn away. The spine of the book is visible on the right side, showing a similar dark, textured material. The overall appearance is that of a well-used, antique volume.

A close-up, vertical view of the fore-edge of a book. The image shows the thickness of the pages, which are aged, yellowed, and show signs of wear, including creases and discoloration. The binding material, likely leather or a similar dark material, is visible along the right edge. The pages are stacked closely together, and the overall appearance is that of an old, well-used volume.
